# We are aiming provide the world class solution by implementing “Software x Design”

## The Solutions

### System Development

Software development,  
System construction

Entrance control requires network applicable software that can efficiently handle tremendously large scale of log data generated everyday

We can support both Windows and Linux system by system development throughout dedicated technical engineer.

Motion picture delivery system: KAMOTIX

Providing totally integrated system from installing security camera to supporting online system set up to add the motion picture delivery system onto your existing website.

Furthermore we recommend our remote surveillance system with high performance camera and server that are implemented in this system.

Website easy update system: Raqoo

This system does not require any technical knowledge to update and control your website.

Basic information required for business website like corporate news, access and contact information are in default setup format. Our original reservation system is an optional for service industry business

### Designing and producing multimedia

Website design and direction service

One of our suitable experts will be selected from our resource and assigned to meet your project to achieve appealing and nice-looking website.

We support our customers in processing annoying steps such as constructing website and operating server.

DTP, pamphlet, custom office supply

Our experienced experts provide total integrated service with planning, designing, printing and delivering printed brochures, pamphlet and custom office supplies.

Please come to consult planning sales promotion, enhancing advertisement and web-marketing.

Custom CD/DVD for promotion and marketing

Integrated service or individual work to provide custom high quality CD-ROM and/or DVD by planning, producing, filming, designing, printing, pressing and delivering.

We suggest variety of planning and contents in Flash and/or movie to satisfy requirements from our customer.

# Application example and accomplishments

## Naeba Prince Hotel Naeba Ski Slope, Asagai Slope

- Live camera view system (KAMOTIX)

Live view from KAMOTIX installed in the Naeba Slope can be accessed any time and it is one of the most popular contents in their website even in no-skiing season.

KAMOTIX camera works great without special housing even in a severe winter season and keeps streaming the realistic scene. Also, the video streaming system is capable of handling concentrated access.

## ICH Japan Inc.

- Website with multiple language capability

ICH Japan is a company who does international business consulting and also policy investigation for Germany and other countries in Europe.

We have established their website that can be browsed in Japanese, English and Germany. The website design was suggested to match with their corporate image as a leading company who work internationally. The website has CMS environment so that contents in the website can be easily updated by themselves.

## G-reserve golf reservation system

- Reservation management and information update system for golf courses

G-reserve is provided as a informative website for golf courses.

This is a tool that supports golf course management by making them easy to update information on website and the reservation system is a golfer friendly and has a flexibility to meet requirements from the golf courses.

# CSR\* – be a trusted company as a member of the society

## Supporting “Internet version of accommodation arrangement guide for wheel chair users” – building bridges for wheel chair barrier-free information

KLOX Co., Ltd. is supporting a barrier-free information website “accommodation arrangement guide for wheel chair users” of the national spinal cord injury victims association.

This website is operated on purpose to work as a bridge between the users and facilities through providing detailed information of accommodation facilities where the barrier-free buildings are located in Japan. KLOX Co., Ltd. is supporting them by constructing and operating the internet system with a point of view of increasing the aging population and barrier-free society.

「Printed version of “Accommodation arrangement guide for wheel chair users” has been published since 1984 so they have more than 20 years of practical accomplishment. We would like to develop and enhance it for many more users to be able to use it easily and simply by implementing the IT technology, and consequently contribute creating the society which all of us can proactively participate.

\* CSR: corporate social responsibility
